Udemy

Skills

Front-End : HTML, CSS, JavaScript, Front-End Frameworks

Back-End : Node.js, Express, MongoDB

Data Structures & Algorithms

Other : EJS, Git Version Control, Authentication and Authorization

Projects

Event Management System

Developed an Event Management System with features for event creation, scheduling, user registration, and real-time updates, leveraging a secure backend and responsive front-end design to enhance user engagement and streamline event organization.

E-Commerce Website

Developed a basic e-commerce platform with product listings, search functionality, a shopping cart, user authentication, and order management. For extra points, I have added a mock payment gateway integration.

Weather Dashboard

Used a weather API to display current and forecasted weather conditions for selected locations. I have added features like a search bar, saved locations, and weather graphics for visual appeal.
